

REMARKS

The Specification has been amended to indicate the relationship of the subject application to previously filed applications. In addition, the claims have been amended to remove the multiple dependency, to correct formalities, and to clarify the nature of the method for treating. Claim 26 has been canceled without prejudice, and claim 29, depending from claim 27 has been added. Support for the disease states recited in claim 29 is found throughout the specification, and in particular with reference to the Method Examples.

No amendment is believed to go beyond the disclosure in the international application as originally filed.

With the entry of the foregoing amendments, the application is believed to be in condition for examination and allowance. Consideration of the claims, leading to their allowance and passage of the application to issuance, is respectfully requested.

Respectfully submitted,

Kevin L. McLaren
